

2019 PREVENTIVE GENERICS DRUG LIST

As of January 1, 2019

Preventive medications are used to prevent conditions like high blood pressure, high cholesterol, diabetes, asthma, osteoporosis, heart attack, stroke and prenatal nutrient deficiency.

This document shows the most commonly prescribed preventive generic medications your plan covers as of January 1, 2019.* Medications are listed alphabetically by the condition they prevent. **The Preventive Generics Drug List is regularly updated so it's important to know that this is not a complete list of covered medications, and not all of the medications listed here may be covered by your specific plan.**

Some plans have specific coverage requirements for preventive medications.

For example, some plans may:

- Require you to pay a copay, coinsurance (the percentage you pay after you meet your deductible) and/or deductible (the amount you pay before your plan starts to pay) to receive coverage for a preventive generic medication. Or,
- Cover preventive generic medications at 100%, or no cost (\$0) to you.

You should log into the **myCigna**[®] website or app or check your plan materials to learn more about how your plan covers preventive medications. You can also use the Drug Cost tool to estimate how much your medication may cost.**

Together, all the way.[®]

* State laws in Texas and Louisiana may require your plan to cover your medications at your current benefit level until your plan renews. This means that if your medication is taken off the drug list, is moved to a higher cost-share tier or needs approval, these changes may not begin until your renewal date. To find out if these state laws apply to your plan, please call Customer Service using the number on the back of your ID card.

** Prices are not guaranteed, and even though a price is displayed in the Drug Cost tool, it's not a guarantee of coverage. Your costs and coverage may change by the time you fill your prescription at the pharmacy, and medication costs at individual pharmacies can vary. For example, your pharmacy's retail cash price for a specific medication may be less than the price shown in the Drug Cost tool. Coverage and pricing may change.

Cigna reserves the right to make changes to this drug list without notice. Your plan may cover additional medications; please refer to your enrollment materials for details. Cigna does not take responsibility for any medication decisions made by the doctor or pharmacist. Cigna may receive payments from manufacturers of certain preferred brand medications, and in limited instances, certain non-preferred brand medications, that may or may not be shared with your plan depending on its arrangement with Cigna. Depending upon plan design, market conditions, the extent to which manufacturer payments are shared with your plan and other factors as of the date of service, the preferred brand medication may or may not represent the lowest-cost brand medication within its class for you and/or your plan.

Health benefit plans vary, but in general to be eligible for coverage a drug must be approved by the Food and Drug Administration (FDA), prescribed by a health care professional, purchased from a licensed pharmacy and medically necessary. If your plan provides coverage for certain prescription drugs with no cost-share, you may be required to use an in-network pharmacy to fill the prescription. If you use a pharmacy that does not participate in your plan's network, your prescription may not be covered, or reimbursement may be limited by your plan's copayment, coinsurance or deductible requirements. Certain features described in this document may not be applicable to your specific health plan, and plan features may vary by location and plan type. Refer to your plan documents for costs and complete details of your plan's prescription drug coverage.
